# KYRAN STAGG

Software Engineer

PROFILE

I am a well-organized, creative, and team-oriented software engineering professional. I enjoy hockey, running, table-top games and above all, people!
I have experience working in full stack development, both individually and in agile teams. I have a track record of delivering top quality solutions using Java, Python and JavaScript in both commercial, study and personal environments.

WORK EXPERIENCE

SOFTWARE DEVELOPER
NZESL (New Zealand Electronic Shelf Labels)
Wellington, New Zealand
2020 – Present

Operating under an NDA, as a solo developer, I am using NodeJS and VueJs to create a solution to handle both RESTful and SOAP API's to fulfill my employer's requirements. Testing and documenting is extensive and thorough. Additional smaller projects are allocated to me including a small app I made with C# and .NET frameworks.

REMOTE SOFTWARE DEVELOPER
Rides.co – Harley Davidson
Christchurch, New Zealand
2020 – Present

I am working in a small team of three developers to migrate, maintain and create new features for the progressive web application *rides.co* (formerly *porky.co*) for *Harley Davidson NZ*. Without the previous code base, we re-created the experience of the old site using *Django*, *JavaScript*, *SQLite*, *Bootstrap* and *AWS* while also adding our own new features. I was mainly responsible for the new QR check-in systems, GDPR compliance and *Modal* element implementations which were deployed through *AWS* using *EC2 Instances*.

EDUCATION

BACHELOR OF SCIENCE IN COMPUTER SCIENCE
2016—2019
University of Canterbury, Christchurch, New Zealand
Graduated in April 2020
